

# FULLSTACK DEVELOPER

We are a Web Solutions Company on the rise looking for several full-stack developers with Node.js and React.js experience to join our team and grow alongside us. Our mission is to become the go-to service provider in Eastern Europe and to create better technology the open source way. Our deepest purpose as an organization is to do so through our employees' passion and devotion to their work.

## What will you do?

You'll build the APIs, services, and infrastructure behind our GraphQL libraries and developer tools and you will translate the UI/UX design wireframes into React and React-Native components that will produce visual elements of the application.

Basically, you will create design plans for the user-facing side of applications, which controls look, feel, and function. They also structure the back part of an application, which manages program logic and server database interaction.

## What should you have?

- 2-5 years of experience working as a Full Stack Developer;
- you have previously worked with Node.js and React.js;
- you have great knowledge of JavaScript, including ES6, MongoDB, Git;
- familiarity with GraphQL, Apollo, Typescript, Jest, Docker, Elasticsearch.

## Why join Cult of Coders?

- You'll be fairly compensated
- Exciting work for international clients
- You can work from anywhere!
- You'll have a flexible schedule

## **FRONTEND DEVELOPER**

### **What will you do?**

You will translate the UI/UX design wireframes into React and React-Native components that will produce visual elements of the application. You will Integrate components with a GraphQL API and work with the UI/UX designer to bridge the gap between graphical design and technical implementation, taking an active role on both sides and defining how the application looks as well as how it works.

### **What should you have?**

- 2-5 years of experience working as a Front-End Developer;
- you are advanced in JavaScript + ES6;
- you have great knowledge of React, Redux, CSS, Less, SASS;
- familiarity with GraphQL.

### **Why @CultofCoders?**

- You'll be fairly compensated
- Exciting work for international clients
- You can work from anywhere!
- You'll have a flexible schedule

## **BACKEND DEVELOPER**

### **What will you do?**

You'll build the APIs, services, and infrastructure behind our GraphQL libraries and developer tools. You'll have the opportunity to learn and use a cutting-edge Apollo stack, define our schemas and data models, and implement and maintain our back-end systems, all while putting into practice the GraphQL-first methodologies that we teach and advocate.

### **What should you have?**

- 2-5 years of experience working as a Back-end developer;
- you have previously worked with Node.js
- you have great knowledge of JavaScript, including ES6, MongoDB, Git, npm packages.

### **Why @CultofCoders?**

- You'll be fairly compensated
- Exciting work for international clients
- You can work from anywhere!
- You'll have a flexible schedule
